

SUGGESTIONS for MAKING DRY POTPOURRI'S

Making Dry Potpourri's is very simple. Find a Recipe below or Create your own with suggestions from below.

Prepare the Scented Fiber bits a day or so ahead of time. Next add all the ingredients in a large bowl or plastic bucket. Mix using disposable gloves on your hands or stir with a large spoon (plastic or metal). Cover the bowl or bucket and let the potpourri 'age' for a couple days so the scents can blend.

Package in Cellophane bags or sealed jars. Vacuum seal food bags or Cellophane bags will hold the scent until they are ready to be used. To freshen once scenting has diminished – simply add more Scented Fiber bits or a few drops of essential oils or Fragrant Fixin's oils to the potpourri materials.
